

2012 PRODUCT CATALOG

our pledge to the environment

We believe that becoming an environmentally friendly company is vital to our future and the future of the planet. Here is what we are doing to make our commitment a reality.

Our glass products are green by their very nature: All glass products manufactured by Anchor Hocking have as primary ingredients, sand, soda ash and limestone; as such they are 100 percent recyclable. All products are reusable and do not require disposal after use. Glass does not break down molecularly from everyday use; a healthier and more environmentally friendly option compared to certain plastic and silicone products.

Other green initiatives include; 25% of all glassware production is made from recycled glass. Our packaging is designed to reduce its environmental footprint, and all print marketing materials are printed on paper stock made of recycled materials.

Our commitment to the environment goes beyond the products we manufacture; we follow through with our day to day practices in the workplace. We are committed to reducing negative impact on the environment.
