2017 Dust Extraction System Launch

OSHA Compliant

- OSHA Table 1 Compliant**

- OSHA-compliant solution for the regulation on respirable crystalline silica dust (29 CFR 1926.1153)

Auto Filter Cleaning

- Two Step Filter System**

- Powerful reversed air pulse activates every 15 seconds on the main filter, maintaining high air flow and minimizing performance drops
- Two Step Filter System
 - The main filter with auto cleaning captures dust at 99.9% efficiency
 - HEPA filter captures the remaining small and hazardous dust as a 2nd step for increased safety, service cost, and maximum filtration level, 99.97% efficiency

Performance

- Performance**

- Powerful motor delivers 148 CFM and 92" of water lift for fine dust extraction
- Power Tool Activated
 - Power outlet on vacuum allows power tool to be plugged in and vacuum will run only when power tool has been turned on
