

Since 1953

**Smart Pest Solutions**

PIC Corporation was established in 1953, when we launched the distribution of the PIC Mosquito Repellent Coil. The PIC Coil became the outdoor-repellent mainstay of the drive-in theater industry. Over three generations, PIC has grown exponentially and now offers more than 30 responsible pest solutions geared toward providing the least toxic pest management available. Today, PIC is the #1 National Value Brand and the leader in providing Private Label bait solutions.

PIC formulates and packages many of our products in our Linden, NJ, facility. In addition to our NJ based production, we source our products from socially responsible suppliers in Europe, North America, and Asia to support our worldwide distribution.

We believe in operating PIC as a socially responsible company. We are proud to engage in partnerships with national not-for-profit agencies, provide jobs for the physically disabled, and educate residents of public housing on integrated pest management. In addition, we donate our pest solutions to service members overseas.

PIC Corporation is diversity owned and operated. Our promise is to provide you, our customer, with responsible pest solutions of the highest quality, at competitive pricing. We pledge to operate our business with social responsibility while serving you with personal and professional care.

*Phyllis Rubel & Family*
