Bath Hardware and Accessories, Bath Safety, Lavatory Guards

PLUMBEREX PRO-EXTREME P-TRAP AND SUPPLY COVERS

Under lavatory supply protectors contain antimicrobial/anti-fungal and UV inhibitors with Self-extinguishing flammability characteristics. Fastening system to consist of tamper resistant, smooth, non-abrasive snap-locks. P-Trap Protector: One-piece protector designed with full rotation option. Protector must have weep holes at the lowest point for proper leak drainage and for ventilation. Designed with removable cap for access to water shut-off. Removable cap can be reassembled and secured; no loose access parts are allowed to ensure long-term tamper-resistance. Includes one P-Trap cover and two valve and supply covers. Compliant with ADA 4.19.4/ABA 606.5 (rev), ICC/ANSI A117.1.

Faucets, Valves and Repair Parts, Flow Control Valves, Pressure Regulator

CASH ACME PRESSURE REGULATOR

Half-cartridge based pressure reducing and regulating valve with bronze body. Supplied by factory with a standard delivery setting of 45 psi. Outlet pressure can be adjusted from 10-70 psi without changing the spring. Intended for use where supply line pressure does not exceed 400 psi. Suited for either cold or hot water service. Features: Compact pressure reducing and regulating valves, certified to ASSA Standard 1003 and listed by IAPMO and ASSE, By-pass mechanism integral with the cartridge.

AMERICAN GRANBY SCH 80 THREADED MOLDED-IN-PLACE BALL VALVE

Heavy duty thermoplastic white PVC (Type 1, Grade 1) construction. Materials meet NSF standards. Meets ASTM 2467 Schedule 80. White body, red handle. Available with EPDM seats providing excellent chemical resistance. EPDM "o" ring stem seal. 150 PSI working pressure at 73°F water, non-shock. Maintenance free compact design. Severe shock loads and misalignment stress are absorbed by the valve body, not the ball & seat, minimizing the chance of uneven wear & leakage.

TOTO DRAKE 1.28 GPF TOILET TANK ONLY

Delivers high-powered flushes while using minimal water. An ultra-wide 3 in. canister flush valve is able to generate ample flowage with just 1.28 GPF, meriting the EPA WaterSense distinction for water conservation. Jet-siphon action bolsters each flush via a glazed 2-1/8 in. trapway that improves efficiency and reduces water bills.

TOTO DRAKE 1.6 GPF TOILET TANK ONLY

This G-Max Drake tank from Toto features a 1.6 Gallon flushing system. G-Max's extra-wide 3-Inch flush valve and wide 2-1/8-Inch glazed trapway offer increased flow, drawing water into the bowl more quickly, and then away more forcefully. And with G-Max's powerful siphon jet, the system makes sure what goes down stays down.

PLUMB PAK UNIVERSAL TOILET TANK REPAIR KIT

The Toilet Tank Repair Kit may fix noisy toilets, toilets that continually run and waste water, toilets that are leaking from the tank and toilets that are slow to refill the tank and bowl. The kit includes the Keeney Fill Valve: Fill Valve fits most standard toilets, adjusts from 9.5" to 13.5". Has a long lasting seal that can be wiped clean, no need for replacement parts. Has an easy push button for simple water level adjustment. Also has a locking ring for safe and secure height adjustments. The fast fill design allows for maximum tank refill speed. Includes a refill tube. The Keeney Flush Valve: Flush Valve fits most standard toilets, adjusts from 7.5" to 11.5". Has an easily adjustable, NO CUT overflow tube. Also a timing-cone water saver flapper. Twist the cone for either high performance or to conserve the amount of water used. And comes with a chain and hook. Finally the kit includes a complete tank to bowl assembly with bolts, nuts and washer for 2 or 3 bolt toilets, and a new sponge gasket for a tight seal. Easy to install!

DANCO HYDROCLEAN WATER-SAVING TOILET FILL VALVE

The hydroclean toilet fill valve is the only valve that solves the two biggest reasons for water loss in toilets-miscalibration and leaks. The patented mini-valve allows pinpoint calibration typically saving 30-Ounce of water per flush in high efficiency toilets and 60-Ounce per flush in older, larger toilets. The hydroclean is green spec certified and won an editor's choice award at the 2008 international hotel/motel and restaurant show and a 2009 retailers choice award at the national hardware show. MJSI products are compatible with and may enhance the water-saving features of watersense leaders kohler, American standard and briggs.

Plumbing Appliances, Water Heaters and Accessories, Expansion Tanks

AMERICAN WATER HEATER PET WATER EXPANSION TANK

Potable water expansion tank. Designed to absorb thermal expansion and to maintain balanced pressure throughout the potable water supply system. PET absorbs the increased volume of water created when the hot water storage tank is heated and keeps the system pressure below the relief setting of the T&P relief valve. Pre-Pressurized steel tank with an expansion membrane that prevents contact of the water.

CAMCO WATER HEATER ELEMENT

4500W/240V screw-in foldback type Ultra low watt density water heater elements are better suited for areas with problem water (hard water, lime, etc.) Premium Ultra LWD Lime Life elements carry a limited 5 year warranty. The Ultra LWD of this element helps prevent lime deposits and the premium nickel-chromium alloy sheath gives it additional strength to resist dry firing. The combined effect make the element better suited for use in areas with problem or intermittent water supply. Screw-in type elements are universal replacement parts that fit most models of American, AO Smith, Bradford White, Craftmaster (prior to 1991), GE, GS Wood (certain models), Kenmore, Lochinvar, Maytag, Mor-Flo, Reliance, Rheem, Richmond, Rudd, Sears, State, Whirlpool and most water heaters manufactured after 1994. The replacement element must be the same voltage and wattage as the element being replaced. Never exceed the nameplate rating on the water heater.

Drain Cleaners, Chemical Drain Cleaners, Septic Tank Cleaners

BACON SEPTIC CLEAN EAGLE 7 CONCENTRATED TREATMENT

A synergistic blend of scientifically developed SUPER bacteria and enzymes for rapid waste degrading. Will digest difficult and non-biodegradable compounds such as detergent, paper, oil, grease, hydrocarbons and phenols. For odor control, Septic Clean will eliminate the source of the problem and not just mask it. The best treatment for all drain lines, septic tanks, cesspools, and grease traps for quick and efficient operation. Non-toxic, non-hazardous and safe to humans and all types of plumbing.

WHINK SEPTIC TANK TREATMENT

Whink? Liquid Septic Treatment contains billions of septic cleaning microbes and enzymes that digest more organic waste, paper and fats faster! Don't be fooled by claims that 4 treatments a year or less are sufficient. Monthly treatment is essential to prevent problems by restoring the microbes destroyed by detergents, cleaners and bleach.

Drain Cleaners, Chemical Drain Cleaners, Septic Tank Cleaners

DRAINOUT SEPTOBAC SEPTIC TANK TREATMENT

The DrainOut SeptoBac formula contains billions of bacteria per gram of powder. Specially selected by leading environmental scientists, these bacteria produce enzymes which digest both organic and difficult-to-degrade septic waste such as paper, wipes, cleaning and laundry chemicals, oils and grease. DrainOut SeptoBac special bacteria strands also have greater resistance to anti-bacterial soaps and cleaners which can reduce the number of regular bacteria in your septic tank. DrainOut SeptoBac also contains microbial nutrients to stimulate bacterial growth. Eight convenient pre-measured pouches.

Quiet pencil point flame - adjustable for precision control. Operates at any angle. Ideal for heating, soldering, sweating pipes and more. Blister packaged.

ITEM #	DESC	SP	UOM	PRICE
622060	MT535C PROPANE TORCH KIT SELF-LIGHTING REGULATED	6@	EA A	32.69 LO.OEX

Propane and Natural Gas Fittings and Accessories, Gas Torch Accessories, Gas Torch Heads

MAGNA MAG-TORCH SELF-LIGHTING PROPANE TORCH

Brass burner tip and regulator for consistent flame. 4-foot flexible hose. Silver Swirl combustion tip resists flame blowout and reduces brazing time by 30%. Use with MAPP or propane fuel. Creates a swirling action inside the tip which mixes fuel and combustion air more thoroughly. Reduces hot spots. Can easily solder up to 3" copper tubing. Use for heating, removing tile, crafts and hobbies, other plumbing repairs, thawing frozen pipes, automotive repairs, sweat fitting joints, bending PVC pipe, removing putty and caulking, etc.

Stainless Steel Gas Pipe and Fittings, Stainless Steel Gas Pipe, Trac Pipe

OMEGAFLEX TRACPIPE

A flexible stainless steel piping material used for natural gas and propane installation. Superior corrugated tubing plus a polyethylene non-chlorinated jacket. Packaged on reels for easy use. Cost effective and reliable. Lower installed cost. Pipe flexibility. Adaptability, lighter and easier to handle. No pipe threading machine, no oil or mess. Fewer joints. An AGA listed and tested projects.

OMEGAFLEX COUNTER STRIKE

Unlike rigid pipe, Counterstrike? disperses electrical energy, and is listed by Factory Mutual for seismic resistance. Installed in tens of thousands of homes, Counterstrike? is the only lightning resistant CSST with the following level of proven performance. Up to 400 times more resistant to the damaging effects of electrical energy than yellow CSST. Meets ASTM E84 with respect to flame spread and smoke density. Lays straighter and pulls easier than competitive CSST. Has higher flow ratings. UL listed.

Stainless Steel Gas Pipe and Fittings, Stainless Steel Gas Pipe Fittings, Flare Flange Fitting

OMEGAFLEX AUTO FLARE FLANGE FITTING

Flange mount fitting. Auto Flare insert. Malleable iron flange. Links all the benefits of Tracie to traditional gas fittings and appliances. Self flaring and easy to use. Self piloting and the joint seals with normal wrenching pressure for safe, gas-tight connections. Superior metal to metal seal with no gasket. Assembly without special tools.

Roll Pipe, Tubing and Accessories, Vinyl and Poly Tubing, Tubing

SIOUX CHIEF BRAIDED TUBING

Polyester braid reinforced polyvinyl chloride tubing. Made from virgin FDA listed material. Has four times the working pressure of single wall PVC. Smooth, dense bore maximizes flow and reduces sediment buildup. Excellent resistance to acids, alkalies, and many solvents. Handles a wide variety of chemicals, gases and liquids. Excellent for hydraulic pneumatic and vacuum lines. Offers superior performance under severe operating conditions. Clear.

SIoux CHIEF VINYL TUBING

Plasticized Polyvinyl Chloride manufactured from virgin FDA listed material. Flexibility of rubber and the clarity of glass. Smooth dense bore maximizes flow and reduces sediment buildup. Handles a wide variety of chemicals, gases and liquids. Excellent resistance to acids, alkalis, and many solvents, makes superior drainage line and protective insulation. Listed by NSF. 1550 PSI tensile strength. Standard 50, 51, 61 NSF listed.

SIoux CHIEF POLYETHYLENE TUBING

Low density polyethylene is manufactured to exact specs from virgin non-toxic FDA listed material. Odorless, tasteless, flexible, lightweight and very easy to handle and cut. Excellent resistance to solvents, acids, alkalis, and fuels. Naturally milky-white color allows fluid levels and flow to be visually monitored. Resists cracking and makes excellent drinking water and pneumatic control lines. Shore D, Durometer, 80+3 hardness.

Quick Connect Fittings, SharkBite Quick Connect Fittings, Couplings

SHARKBITE SLIP COUPLING

For use with copper only. Slip fittings simplify repairs and connections by doing the job of two fittings and extra pipe. Only one end of the fitting's slip section has a stop, allowing the other end to slide further onto the end of a pipe. A small section of pipe is removed to install a slip fitting. Then push the long end of the fitting's slip section onto the pipe. Use a disconnect tool to press against the release collar on the long end of the fitting and at the same time, push the slip fitting onto the other pipe end to a depth of one inch. Certified and listed to ASSE 1061/NSF 61. Listed by IAPMO and are certified for potable and hydronic heating water distribution. Certified for underground applications and as a manufactured joint without access panels and they meet UPC and IPC requirements. Lead-free.

Plumbing

Quick Connect Fittings, SharkBite Quick Connect Fittings, Tees

SHARKBITE PVC X PVC X CTS TRANSITION SLIP TEE

Allows you to add a line into your existing plumbing system while converting from Copper (CTS) pipe to PVC pipe. The slip feature allows you to cut into an existing Copper Tube Size Copper, PEX, PE-RT, or CPVC pipe and run out PVC Sch. 40, 80, or 120 from the Tee. The white collar center connection fits Sch. 40, 80, 120 PVC and also can be used on IPS CPVC Sch. 40 and 80 pipes. The Mustard collar ends fit CTS Copper, PEX, CPVC or PE-RT pipe. Allows up to 2" of Copper to be removed from a rigid pipe installation. Simply insert the slip coupling on to the pipe and using the SharkBite demount clip to slip the fitting back onto the other end of pipe completing the connection. Note: Can only be used on copper and CPVC pipe.

SHARKBITE STRAIGHT LENGTH PEX PIPE

A cross-linked polyethylene tubing for a wide range of residential and commercial plumbing applications. Manufactured without an oxygen barrier for potable water systems. The repeating SharkBite imprint pattern provides a visual aid to determine if the tube has been inserted all the way into the SharkBite Push-Fit Fitting. This feature only works if the tubing is cut between the SharkBite imprint pattern. ASTM F877-2-11a and CSA B137.5-2009 & NSF/ANSI 64 approved.

FLAIR-IT 5' STRAIGHT PEX TUBING

For hot or cold Water. Made of the finest cross linked polyethylene (PEX). Flexibility that allows fast installation, bends easily around corners. Withstands freezing, gets stronger as the temperature gets colder. Tubing has been tested to withstand freezing down to 95 F. Winterizes easily and can be used with most anti freeze solutions. Repairs easily, should ever a frozen tube need thawing, simply apply heat, using a heat gun, the flexible tubing will not weaken from the applied heat. Type A PEX.

PVC Pressure Pipe and Fittings, Schedule 40 PVC Fittings, Check Valves

WATTS REGULATOR LEAD FREE BRASS DUAL CHECK VALVE

Prevents the reverse flow of polluted water from entering into the drinking water supply at the service entrance or at individual outlets. It consists of a Lead Free cast copper silicon alloy body construction, with two compact replaceable plastic check modules, and stainless steel springs. Designed for non-health hazard residential water system containment, continuous pressure applications. It is installed immediately downstream of the residential water meter, in a vertical or horizontal position. Check with local inspection authorities for installation requirements. Minimum Working Pressure: 10psi (69 kPa) Maximum Working Pressure: 175psi (12 bar).

DWV Pipe and Fittings, DWV Pipe, Plain End Pipe

SCHEDULE 40 PVC/DWV PLAIN END PIPE

Light-weight, easily joined, modern corrosion resistant plumbing pipe with highest impact resistance. Outlasts, out performs, cast iron, copper or steel yet weighs as little as 1/10 of those materials. Cuts easily and accurately with a hand saw, joins immediately with a brush-on welding solvent and the joint is stronger than the pipe itself. White.

ADS COREX DRAIN PIPE PERFORATED W/SOCK

High density polyethylene makes this product resistant to corrosion and abrasion for a longer use-life cycle.

Polyester fibers are knitted to create a superior protective covering for perforated drainage pipe to prevent migration of native soil into imported backfill and pipe. Lightweight and flexible for easy installation.

Sewer and Drain Pipe and Fittings, Corrugated Sewer Drain Pipe and Fittings, Channel Leveler

ADS 4" TUF-TITE SPEED LEVELER

Speed Levelers are precision engineered to fit commonly used Schedule 40 Thick-Wall, SDR 35 (3034) and 2729 Thin-Wall PVC pipes. Simply press the Levelers into the pipe ends. They fit water-tight. No tools necessary. Molded of specially formulated polyethylene that is highly chemical resistant. Acutely more corrosion resistant than the PVC pipe in which they're used. Easily rotate Speed Levelers by hand. The Flo-Hole can be positioned to admit effluent at the precise level you desire. The range of settings is infinitely variable and can be reset easily anytime. Significantly improve distribution in gravity-flow septic systems. For all size and shape concrete distributions boxes, as well as polyethylene boxes.

Sewer and Drain Pipe and Fittings, Corrugated Sewer Drain Pipe and Fittings, Channel Drain Emitter

NDS POP-UP DRAIN EMITTER WITH ELBOW

Allows water to be diverted and released to water-safe areas away from structures, erosion-prone landscapes and poor drainage areas. Opened by the hydrostatic pressure of water flowing through the drain pipe. As flow diminishes the miter closes again. The emitter is closed during dry weather, debris and rodents cannot enter the drain pipes. Does not rise high enough to interfere with mowers. Blends into the surrounding landscapes. Green.

Sewer and Drain Pipe and Fittings, Rubber Pipe Fittings, End Caps

PIPECONX BAND-SEAL END CAPS

Flexible rubber end caps for capping cast iron, steel, PVC and ABS pipe ends. Molded "X" braces end cap against head pressures encountered in testing. Fast and easy to use over and over. 300 Series stainless steel clamp may be tightened or loosened in seconds with a screwdriver or wrench. So strong it doesn't need the usual reinforcing plastic disk or liner. Creates wedge against pipe inside, balancing outward strains against the restricting exterior

PIPECONX EC 600 END CAP

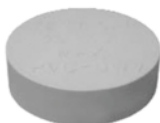

Made from strong, flexible PVC for a tight fit. Fast and simple to use, these caps are the best method for sealing open test pipe ends and cleanouts. Just slip cap over open pipe end and tighten clamp. Pipeconx EC's are the economical version of our Pipeconx FC's.

IDEAL CLAMP SMART SEAL CLAMP

1/2" SmartSeal, a self-adjusting all stainless steel clamp that forms a unique 360 degree seal in response to pressure and temperature changes! The improved clamp roundness eliminates leak paths and the exclusive trough shaped design creates higher pressure loading. Comprised of two main parts, the clamp assembly and the high quality-thin gauge SmartLiner, SmartSeal grips by penetrating deeper into the hose wall over a narrower cross-section (footprint). With their compact design and lower profile, you get an optimal heavy-duty constant tension clamp without all the bulk. Applications include radiators, turbo charged applications, solar panels, vehicle HVAC, pipe fluid connectors, soft hose applications, generators, home appliances, tractors/trucks and most vehicle fluid applications. Installation Torque: 48 in-lbs (5.4 Nm). Min (in) 1-1/8, Max (in) 1-9/16.

318442	FB32 FIRE Z OFF QTR	6@	EA A	20.49 CR.CRX

RDR COOLDOWN SPRAY

Unique formula that instantly cools hot metal with just a few squirts. Absorbs heat 21 times faster than water alone. Doesn't shock and weaken the metal. Perfect for auto mechanics having to work with hot mufflers, brake pads and engine parts, or welders who would normally have to wait for parts to cool. Can also be used on rebar, plastic, rubber, wood, glass and nearly anything else that can retain heat. Just a few squirts makes white-hot metal cool enough to touch.
