PRODUCT CATALOG

Purdy®

PROFESSIONAL PAINTING TOOLS

*Quality.
Integrity.
Value.*

Purdy® began in 1925 when S. Desmond Purdy began building paint brushes in his garage in Portland, OR. Mr. Purdy built his brushes on three foundational principles—quality, integrity, and value. Although handcrafting the finest painting tools may take longer, it is the only way to "build in" the qualities that create a brush of superior coverage and unsurpassed performance.

Over 90 years later, Purdy® is still dedicated to crafting the finest applicators in the industry.

Keep the **KEEPER**

**Keepers are more than just packaging,
they help brushes last longer.**

Purdy® engineers brush bristles to return to their most relaxed state after use. Keepers help by guiding the bristles to return to their original state, maintaining premium form and extending its life. All Keepers are covered in wax to prevent water penetration and are designed for increased air flow, eliminating the potential for mold development.

BRUSHES

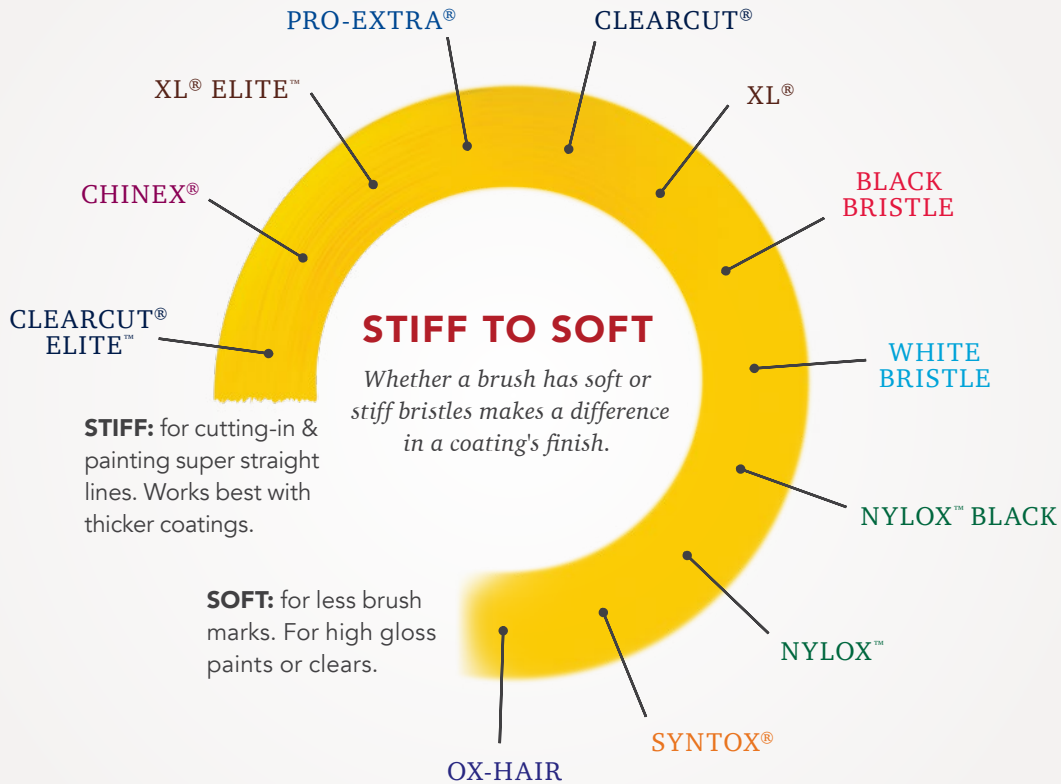

Expertly crafted for
LASTING QUALITY

Purdy® brushes are handcrafted in the U.S.A. by expert brushmakers, many with decades of experience. Each brushmaker learns from their peers for two years to gain all the knowledge it takes to be an expert. This dedication to crafting the highest quality brushes is reflected with a personal sticker on each brush, featuring the signature of the brushmaker who crafted it.

How to CHOOSE A BRUSH

Not All Brushes Are Created Equal. All Purdy® brushes feature Alderwood handles, resulting in a light, durable and maneuverable handle that absorbs sweat to keep hands dry. Brush filaments are tipped and flagged around the entire

brush, which increases control and lay off of finishes. With synthetic filaments and natural bristles sourced from the finest natural resources, Purdy® is dedicated to the highest standard of quality.

WALL OR TRIM

Within each brush series, brushes are classified as either a wall or trim brush.

Trim brushes are for short strokes when you need more control, so they hold less paint.

Wall brushes are for longer strokes when you need to cover more surface area, so have thicker bristles, or filaments, to hold more paint.

SIZE & STYLE

Small size brushes or widths are good for detailed work on small spaces, like furniture spindles or mutton bars on windows.

Angular style brushes are also excellent for getting into tight corners.

Large size brushes are good for big surface areas, where a roller isn't ideal, such as fences or curved surfaces, like a boat hull.

Flat style brushes are great for laying off paint and coatings on continuous surfaces, as opposed to corners, like angular. However, both can be used for everything depending on your painting style.

THE PERFECT HANDLE

The ideal brush handle varies based on how the painter prefers to hold a brush.

Rattail: Long and skinny to hold like a pencil.

Fluted: Square with cut off corners to rest easier in a hand.

Beavertail: Thick and round for fitting nicely in the palm of a hand.

Short: Short in length for painting tight spots, where a longer handle would get in the way.

CLEARCUT® ELITE™ Series

AN EVOLUTION OF CLEARCUT® WITH A STIFFER FORMULATION FOR LOW-VOC COATINGS.

Coating Types: Low-VOC and Latex Paints and Primers

Surface Types: Precision work around Molding, Trim, Corners, and Ceilings

Filament Materials: Tynex® Nylon / Orel® Polyester Blend

ROLLER COVERS

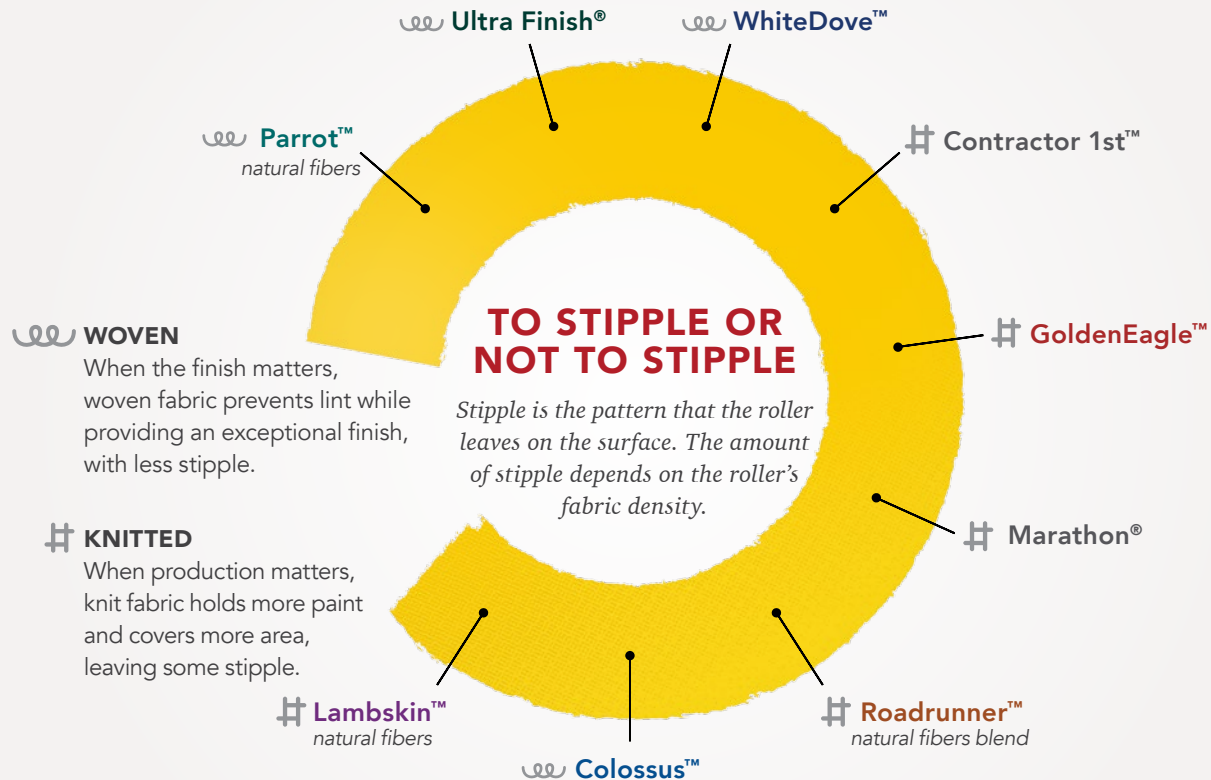

A full line to cover
EVERY JOB

Producing roller covers that result in less spatter, even release, or a lint-free finish, has been part of Purdy®'s dedication to innovation. Purdy® has developed exclusive proprietary manufacturing processes to produce high quality products for professionals who use them to earn their livelihood. After each roller cover is wound, they are double vacuumed to reduce potential fiber shedding and then hand inspected to ensure they meet Purdy®'s high quality standards.

How to CHOOSE A ROLLER COVER

Keep on Rolling. Purdy® roller covers feature durable polypropylene cores that are resistant to all paints, stains, and solvents, extending their life. For increased durability, thermal bond technology winds roller cover fabric to the

core with a perfect spiral seam for smooth rolling. Ultra durable roller cover cores eliminate bending, allowing even contact with the wall. No matter the project, there is a Purdy® roller cover for exceptional results.

NAP SELECTOR

The nap size is determined by the surface you are painting.

1/4" nap
metal doors

3/8" nap
walls and ceilings

1/2" nap
textured walls, decks, and concrete

3/4" nap
stucco, decks, and masonry

1-1/4" nap
brick and masonry block

WE'VE GOT YOU COVERED

The size of a paint project is important, and so is the roller cover.

Using the same roller cover fabric and nap size is important to ensure a **matching stipple** on the final finish. Whether using a mini roller cover to paint behind an appliance or an 18" roller cover for today's large open floor plans, you are sure to get a beautiful, consistent finish with Purdy®.

Purdy® also offers two different mini roller cover styles that are made from the same materials as the standard roller covers: **wire mini**, which have a smaller wire shaped core, and **jumbo mini** featuring a slightly larger, more traditional roller core.

Ultra Finish® Series

PREMIUM MICROFIBER FOR AN ULTRA SMOOTH FINISH.

Coating Type: Latex and Oil-Based Paints

A top-down view of various faux finish tools arranged on a dark grey surface. In the top left is a blue triangular comb with 'SYMPHONY BY PURDY' embossed on it. Next to it is a white roller with a yellow core. To the right is a brush with a blue handle and a silver ferrule labeled '3" 75mm'. Below these are a wooden-handled brush, a blue-handled brush, and a blue-handled brush with a black back. A small bowl of gold pigment is on the left, and a yellow sponge is in the bottom right. The text 'FAUX FINISH TOOLS' is centered in white.

FAUX FINISH TOOLS

Turning hard work
into **ARTWORK**

Purdy® faux finish tools leave an exceptional and durable finish on all faux projects. Specially created to produce beautiful effects with ease, Purdy® has a product for every faux project.
