THE SMARTER AND FRESHER CHOICE

Eliminates Odors

Bad odors are the #1 purchase trigger for automotive air fresheners. But consumers do not see current air fresheners eliminating odor, rather just masking them with fragrance. There is a huge consumer need to address odor elimination.

Premium Innovation

All DUO products are designed with two chambers ... one that features a patented odor eliminator, the second that houses the fragrance, infused with essential oils for long lasting freshness that never overwhelms. The result is a visibly different product that is preferred to all existing brands in our consumer testing.

Clear Message

Clean, strikingly modern, and easy to read packaging, eliminates the confusion and simplifies the shopping experience. A Scratch n' Sniff label provides an accurate fragrance sample ... leading to the highest level of shopper satisfaction.

GO COOLER

AND HEAT UP SALES!

GoGear® sunshades offer basic, advanced, and premium performance attributes, making it easier to educate consumers and trade them up to higher quality solutions. Universal Fit™ design provides better protection, fitting over 95% of vehicles on the market (nearly 20% more than the competition).

UNIVERSAL SIZE

NEW

GoGear® designs are validated through extensive consumer research, and are preferred over existing designs in the market.

But why stop there? Not only are our designs better, but our sunshades also fit better. Universal sunshades in the market today are not designed to fit many of the most popular vehicles on the road. Hopkins has measured these vehicles in detail to design a better-fitting universal sunshade for cars, trucks & SUVs.

Carrying a single, universal size means there is more room in the planogram for fresh designs. By adopting the most modern universal sunshade in the market today, shoppers not only get a better fit for their vehicle, they also have a larger assortment of fashion to choose from.

STRONG AS STEEL™

Patented structural design combined with super strong material makes the RhinoRamps® as strong as any other ramps on the market, resin or metal.

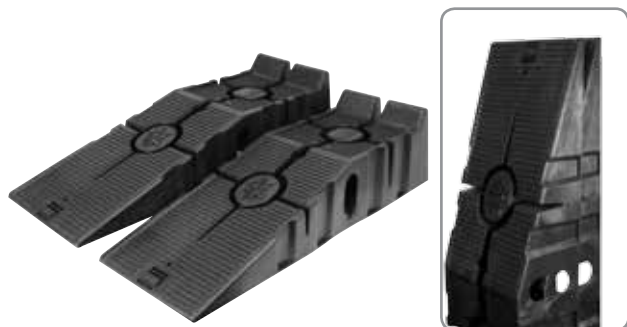

Nestability

The unique, nestable design not only saves space in the consumer's garage, but more pieces on a pallet means saving space in the warehouse, on the truck and on the retail shelf.

Better by Design

Our integrated Core-Trac™ non-skid feet reduce sliding during use while an improved tread pattern and wide design make these the most secure ramps on the market. The ramp design also works for low profile vehicles ... a feature many other ramps don't have!

LIFT YOUR SALES AND YOUR CUSTOMERS' SATISFACTION

EasyLift Rider Ramps™ make mower maintenance easy. Their curved design allows the consumer to roll up onto the ramps rather than lifting the mower up onto blocks. Equipped with skid resistant rubber feet and molded teeth for use on concrete or in the yard. A structurally sound, stackable design allows these ramps to hold up to 500 pounds while taking up less space on the retail shelf. Increase sales by placing a floor display next to your riding mowers.

Unique Filter Technology

When fuel is poured through a Portable Fuel Filter, water and debris will not pass through the filter's fluoropolymer-coated stainless steel filter. Only filtered fuel flows through to your engine, improving its efficiency, durability, and proper operation. The sump area collects the deflected water and debris for proper disposal.

DIY Projects Simplified

Our 2x4 Basics® brackets have been designed to make garage organization and outdoor furniture projects as simple as possible, from a heavy-duty workbench with shelves to a picnic table and matching chairs.

Only 90° cuts are required, no miters or angles, and projects can be built to any length up to eight feet. And to simplify the process even more, only 2x4 lumber is needed for most projects.

High Quality Products

Being made of heavy gauge structural resin, all 2x4 Basics brackets have a simple yet durable design allowing them to hold up to rough conditions.
