1/2 DUMMY	**488**	For doors where only a pull is required. Surface mounted.

HOW TO DETERMINE THE HANDING OF A DOOR:

- The hand of a door is always determined by facing the OUTSIDE of a door.
- If the hinge is on the left side of the door, the door is left handed (LH).
- If the hinge is on the right side of the door, the door is right handed (RH).
- To determine the hand of a dummy lever, face the side of the door it will be used on. If hinges are on left, order L.H., if hinges are on right, order R.H.

Signature Series

12 locks per case.

Featuring SmartKey® Re-Key Technology
- ANSI/BHMA Grade 2 Certified.
- The smart alternative to master keying.
- Interior turn piece meets 4.13.9 ADA requirements.
- Lifetime Mechanical Warranty.
- Lifetime Finish Warranty.

Key Control -
- Top concealed cylinder provides one-key control for the property manager.
- Lower exposed cylinder allows unique user keys for the tenant.
- Re-key your user or control cylinder at any time in seconds.
- Maintain key control throughout tenant and employee turnover.

Increased Efficiency
- Re-key the lock without removing from the door.

816 Single Cylinder
US-3, 5, 15, 26D

Key Control Cylinder
(property manager)

User Cylinder
(tenant)

Easily access the Key Control cylinder: **(1)** Insert the SmartKey tool into the slot at the bottom of cylinder cover **(2)** Rotate cover clockwise to expose the Key Control cylinder **(3)** Now you have access to the Key Control cylinder. Use tool to rotate counter-clockwise back to user's keyeay when appropriate.

*Cylinder cap removed to show both cylinders

HOW TO DETERMINE THE HANDING OF A DOOR:

- The hand of a door is always determined by facing the OUTSIDE of a door.
- If the hinge is on the left side of the door, the door is left handed (LH).
- If the hinge is on the right side of the door, the door is right handed (RH).

KEYING KITS, PINS, KEYING ACCESSORIES
(Continued)

**KW-83260** SmartKey® (SMT) Reset Cradle

The SmartKey Reset Cradle is a tool used to repair a SmartKey cylinder that has been programmed incorrectly. This can occur if the cylinder will not turn in either direction. Simple and easy to use. Simply remove the lock from the door, remove the Smarkey cylinder plug, insert into the reset cradle and the cradle will reset the cylinder to learn a new key. A must have for landlords or where there is a high possibility of lost keys.

See page 172 for "How to re-key a SmartKey cylinder".

HOW TO RE-KEY A SMARTKEY® CYLINDER IN 3 SIMPLE STEPS.

SMARTKEY.
RE-KEY TECHNOLOGY

EASILY RE-KEY IN 3 SIMPLE STEPS:

1 Insert functioning key & turn 1/4 turn clockwise.

2 Insert & remove the SmartKey learn tool. Remove functioning key.

3 Insert new key and turn 1/2 turn counter-clockwise. Your lock is now re-keyed!

You must have your functioning key & your SmartKey tool for the system to work.

SmartKey Tool   +   Functioning Key

KW-83260
SmartKey® (SMT) Reset Cradle
The SmartKey Reset Cradle is a tool used to repair a SmartKey® cylinder that has been programmed incorrectly. See page 168 for more details.
