

DARE

Over 60 years of Electric Fence Experience.

The Dare Way.

Since 1946, Dare has withstood the test of time, by doing what we've always done best—manufacturing a full line of quality electric fencing equipment and other related products.

Our philosophy is simple—continue manufacturing quality products to enhance the long term customer relationships we have developed right from the beginning. Utilize and maintain a knowledgeable and dedicated workforce and sales team. Strive to be the industry leader in product quality and innovation.

And above all, guarantee overall customer satisfaction...

That's the Dare way!

ELECTRIC FENCE ENERGIZERS

Dare Products' wide range of high performance Electric Fence Energizers. All Dare energizers use **ULTRA LOW OR LOW IMPEDANCE** technology with these standard features:

- Modular circuitry for fast and easy service
- All weather construction for longer life
- Peak Joule output under the most difficult fence conditions
- Two year OTC warranty including lightning damage on most models
- Built in lightning protection
- UL and CSA approved on most models
- Designed and assembled in USA

ENFORCER—110 Volt Models

Best value! Provides the most output for each dollar spent. Use where electrical power source is available—only costs pennies a day to operate. When possible, 110 volt models are always the first choice.

GATE HANDLES AND GATE HARDWARE

OLD IRONSIDES®

These features make OLD IRONSIDES® better:

- Safety hook and body formed as one...from 7/8" diameter steel pipe.
- Spring mechanism consists of 4 1/4" long compression spring fastened to a 5/16" diameter eyebolt.
- All metal parts permanently assembled using 20 tons of force. No flimsy snap-on/push-on fasteners used anywhere.
- Large insulating grip measures 5 1/8" long with a 2 1/4" diameter flange for extra shock protection. Molded of a soft flexible material that will not chip, crack or break when abused.
- Performs in any climate. Metal parts plated to resist rust. Molded grip contains carbon black to deter UV rays.

SPLICING EQUIPMENT

DARE SLEEVES, TAPS AND TOOLS The sleeves and taps are designed to speed and improve installation and repair of all common sizes of barb, woven and smooth fence wire. DARE SPLICING SLEEVES equal and often exceed the breaking strength of the original wire. They are the only style recommended by most manufacturers of high-tensile systems. DARE TAPS are handy when used to connect hook-up, grounding and jumper wires to the fence line. Trouble-free connections can be made quickly and easily. Special application tools are made of high-carbon tool steel and are provided with gauges to insure strong and dependable splices and connections.

Grippler Plus Wire Joiners & Tensioners range for use in fencing, trellising, and greenhouse applications.

- Suitable for all types and sizes of wire (mild or high tensile steel, and polymer wire too)
- Use on plain, barbed, or electric wire and on all types of stock fence • Adjustable and re-tensionable
- Ideal for use at installation, and for fast and economic repairs • Four times faster than traditional methods

The fundamental principle of a Grippler Plus device is simple; there are two channels, each with an independent locking mechanism. The "lock" is created by the roller, which is free to move in one direction only and grips the wire as it moves back. This concept allows tension to be applied throughout the life of the wire.
