## ***Introducing IPG's new, full line of aluminum foil tape products!***

The IPG line of aluminum foil tapes address the most significant application usage range within the industrial, HVAC, aerospace, appliance, and marine industries:

- **Joining pipe insulation jackets**
- **Seaming fiberglass duct board**
- **Patching sheet metal ductwork**
- **Reflecting and dissipating both heat and light**
- **Protective masking during chemical paint stripping**
- **Sealing insulation to create a vapor barrier**

IPG aluminum foil tapes are engineered with an aggressive long, lasting pressure-sensitive adhesive that demonstrates superior bonding when exposed to both sub-zero and elevated temperatures. The shiny, UV resistant foil backing offers an enhanced appearance, excellent reflective and flame retardant properties, and remains flexible to resist cracking and lifting around irregular or curved surfaces.

### ***Did You Know?***

*IPG's acrylic adhesive foil tapes are formulated to withstand hot and cold temperature extremes, as well as the industries highest level of solvent resistant protection. We take the guesswork out of choosing a foil tape product.*
