SuperFlexx™ Stainless

Made specifically for the drywall pro, these rust-resistant stainless steel blades combine a Rockwell hardness that resists dulling and wear with much greater flexibility than other stainless steel tools on the market. A thinner hollow grind profile and flex point give these the flexible feel that many pros prefer for mudding and taping walls. Overmold comfort grip and Hammer Head® end for resetting popped nails and screws.

Hammer Head® End for resetting popped nails and screws

Overmold Comfort Grip

Stainless Steel Blade with a thinner, hollow grind profile, is 25% more flexible than other stainless steel

Did someone say dust-free?

Do it the HYDE® way.

Before there were HYDE® Dust-free Sanders, every sanding job turned into two jobs — sanding your project, then cleaning invasive dust off of every surface.

All that changes when you attach a HYDE® Dust-free Sander to your wet-dry vacuum. These sanders eliminate 95% of the dust, so you get professional sanding results without the cleanup, and without risking your health by choking down all that dust.

SANDING TOOLS

Choose the Style to Match Your Job

Dust-free Drywall Sanders

Instead of sandpaper, these sanders use an abrasive drywall sandscreen that allows drywall dust to be pulled into your vacuum instead of fouling the air and landing on the floor. The sandscreens, which are washable and reusable, last much longer than sandpaper — and when you do have to replace them, our patented EasyClamp™ system makes that easy, too. Models include a hand sander and full pole sander. Pole sander also comes without the pole and can be used with any Acme thread extension pole. Sandscreens are available in fine, medium and coarse grits.

New! Dust-Free Sponge Sander for Any Surface

This sander was designed for use with any type of surface, including drywall, stucco, wood and metal. It uses a standard sanding sponge, which makes replacement fast and easy. A channel around the sponge allows the vacuum to remove 95% of the dust, eliminating difficult cleanup. Replaceable sanding sponges are washable and reusable, and last 3 times longer than sandpaper. Can be used with any 3" x 5" sanding sponge.

Part #09160

*Clam shell, 5.6lb, 1pk

09160 Dust-free Sponge Sander

Attaches to a wet-dry vac and uses a sanding sponge that works on any type of surface. Comes with 2 medium grit sponges including 1 to use in corners without damaging the abutting surface. Patent pending.
*Boxed, 1.0lb, 4pk

SANDING TOOLS

No more struggling with sandpaper!
Just set the ClawGrip® on top of a sanding sponge, press, and you're ready to sand. Patented design works with flat and triangular/corner sponges.

Pole Sanders

ClawGrip® Sponge Sander

This patented new aluminum sanding head has two "claws" that grab hold of the included sanding sponge to create a no-flip, low-profile sanding tool that's easy to load and use. The U-joint design provides a smooth sanding action using high-quality sanding sponges that last 3 times longer than sandpaper. Replacing the sponge takes under 5 seconds. Sponges can be rinsed and are reusable and replaceable.

09049 ClawGrip® Pole Sander with Flat Sanding Sponge

Comes with a 2-sided, medium grit sponge (item #09083). Quick, easy changeout for sponge replacement. Can be used with sponges #09051, #09052, #09054 and #09083.

*Carded, 3.7lb, 5pk

WATER TOOLS

The HYDE® PivotJet®

Turns any hose into a powerful cleaning machine

Virtually every home has a hose, and millions more have pressure washers for heavy-duty cleaning. But for dozens of cleanup jobs around the house, something in-between would be a much better choice. That's where the HYDE® PivotJet® comes in. The PivotJet® and PivotJet® Pro are innovative spray tools that attach directly to your garden hose. They not only add extra reach and an adjustable spray pattern – they feature a pivoting nozzle that gets into tight spaces and lets the tool do the work instead of your body. No more bending, kneeling or stooping.

Designed to make both home and commercial jobs easier, this patented tool design includes a pivoting nozzle that redirects the water with the twist of the grip. For easy cleaning with detergents and commercial cleaners, the Pro model also features a clean water/soap reservoir with mixture and liquid ratio settings.

Pivot Nozzle Wands

Adding a Pivot Nozzle Wand to your pressure washer allows you to step back, stay dry and reach into every nook and cranny without pain and strain. With a twist of the handle the patented nozzle pivots up to 90° as you work, so you can reach in, over, under or around obstacles and still keep a 90° angle to the surface for maximum power. With the Pivot Nozzle Wand, the tool does all the work, making pressure washing more productive and much less tiring. Models are available for use with all major brands of gas and electric pressure washers. U.S. Patent #6979644. Other U.S. and International Patents Pending.

28420 18" Pivot Nozzle Wand for Electric Pressure Washers

Rated for electric pressure washers up to 2000 PSI, the 18" Pivot Nozzle Wand is perfect for cleaning decks, house siding, cars, ATVs and more. Includes 4 adapters for use with all major brands of electric pressure washers.

**Clam pack, 5.9lb, 4pk*

28430 28" Chrome-Plated Wand for Gas Pressure Washers (M22-style)

Designed specifically for M22-style gun fittings, the 28" Pivot Nozzle Wand is a professional grade tool engineered to stand up to the most demanding jobs.

**Clam pack, 2.9lb, 1pk*

28440 40" Chrome-Plated Wand for Gas Pressure Washers (1/4"-style)

Rated for up to 4000 PSI and designed specifically for 1/4" "female" gun fittings. Soft-touch, rubberized grip provides non-slip control. Heavy-duty lightweight housing with durable chrome-plated shaft.

**Clam pack, 3.3lb, 1pk*

28450 40" Stainless Steel Wand for Gas Pressure Washers (1/4"-style)

Rated for up to 4000 PSI and designed specifically for 1/4" "female" gun fittings. Soft-touch, rubberized grip provides non-slip control. Heavy-duty lightweight housing with stainless steel shaft.

**Clam pack, 3.3lb, 1pk*

Turbo Nozzles

Powerful ceramic tip designed for blasting and removing stubborn and encrusted stains. Produces a high-pressure (0°) pencil jet stream and rotates it at 3000 RPM creating a 4" to 8" cleaning circle. Fits most consumer-grade pressure washers with quick-connect style connections and includes a male quick-connect plug (AL-PLUG 1/4mB). It is fully compatible with the gas and electric versions of the HYDE® Pivot Nozzle Wand.

AIRLESS SPRAY TOOLS

The RVT Airless Spray System

The HYDE® RVT Airless Spray System is simply the best airless spray system on the market. It comes with a telescoping QuickReach® pole that extends up to 8-1/2', giving paint crews more reach for spraying exteriors, stairwells, raised decks and even cathedral ceilings without climbing ladders or setting up scaffolding. A lightweight spray head at the top of the pole makes this system easy to use for an extended period. No heavy spray gun at the top of a teetering pole! As you come down a wall, you can easily switch from pole spraying to the handheld gun (included) — without powering down! No paint goes through the pole, so cleanup is easy.

28700 HYDE® Airless Spray System with RVT Technology

Full kit includes an airless spray gun with an RVT valve, tip, tip guard and inline filter, and a 5-1/2' to 8-1/2' spray pole. Gun is fully assembled and ready to spray. U.S. Patents #6378922, #5485960 and patents pending.

**Clam pack, 6.6lb, 1pk*

The HYDE® RVT system is a better way to spray.

“The HYDE® RVT saves us time and an unbelievable amount of money.”

Jay Bowen, Eastern Painting and Refinishing
Hyde Park, VT

Paint every job faster with less fatigue.

Finally, an airless spray system that lets you spray non-stop, switching easily from gun to spray pole as you paint. Unlike most poles, the RVT telescopes ... extending your reach up to 12 feet.

No more ladders or scaffolding. No powering down or depressurizing. And no need to carry a heavy gun at the top of the pole. Just pop the lightweight valve off the gun, mount it to the pole and keep on spraying. No paint runs through the pole, so even cleanup is easy!

QuickReach® Telescoping Poles

QuickReach® Telescoping Poles extend out to their maximum height in seconds, offering the professional painter freedom of reach and coverage. Lengths vary to accommodate indoor, one-story applications or large jobs requiring paint heights up to 16'. Can be used with all major brands of spray gun. Can also be used with the HYDE® RVT System (Item #28700). U.S. Patents #6378922, #5485960.

28670 4.5'-6.5' QuickReach® Telescoping Spray Pole

Extends from 4.5' to 6.5' for use in applications with ceilings or paint heights up to 10'. Perfect for one-story exterior and indoor painting.

**Boxed, 4.0lb, 1pk*

28680 5.5'-8.5' QuickReach® Telescoping Spray Pole

Extends from 5.5' to 8.5', offering the professional painter freedom of reach and coverage for a wide range of jobs. Small enough for indoor use or painting in tight spaces, but long enough when extended to reach 16' ceilings.

**Boxed, 4.7lb, 1pk*

28690 7.5'-12' QuickReach® Telescoping Spray Pole

Extends from 7.5' to 12', giving the professional maximum extension for painting exteriors, cathedral ceilings or areas normally reached on a ladder.

**Boxed, 5.7lb, 1pk*

28730 QuickReach® Replacement Mount (RVT Compatible)

Quick-connect replacement mount for RVT-compatible QuickReach® poles (items #28670, #28680, #28690) or with RVT System (item #28700).

**Boxed, 4.6lb, 4pk*

AnglePRO® Spray Poles

The AnglePRO® airless spray pole has a patented lever that lets you change the spray angle up to 145° without stopping to manually adjust. Quickly paint soffits, closets, ductwork or any other job that requires reaching into tight areas. U.S. Patent #6976644.

28260 3' AnglePRO® Spray Pole

Spray nonstop while adjusting your angle for maximum coverage of complex angles or open framework. 3' pole, pressure rated to 4000 PSI for most paint and coating applications.

**Boxed, 2.0lb, 1pk*

Wet & Set® Wall and Ceiling Repair

There simply is no faster, more professional way to repair a hole or crack in drywall, plaster, stucco or even wood than with this fabric patch that hardens into a permanent patch within minutes. Cut it to size with scissors. Then, just dip it in water and spread it over the damaged area. Stains, holes, cracks and crumbling damage disappear within seconds, replaced by a hard, permanent patch that's ready for a finish coat within 20-30 minutes. Perfect for flat, curved or uneven surfaces. WET & SET® forms a strong polymer adhesion that won't peel or delaminate like some patching materials do. In most cases, one coat of patching compound is all it takes — no two-day wait to finish up the job. Available in single flat sheets or economical 3-yard contractor rolls.

DRYWALL TOOLS

Taping a wall?

42

Save a whole day of drying time.

WET n STICK® Water Activated Joint Tape bonds directly to your drywall for faster, easier taping. Just cut it to size, wet it, and press it into the joint for a permanent bond that will never delaminate like mesh or paper tape. After 20-40 minutes, it's ready to coat. Creased for corners.

WET n STICK® Water Activated Joint Tape

Do it the hard way,
or the HYDE® way.

Drywall Joint Tape

Reinforced Joint and Corner Tape

Flexible 2" paper tape with two plated-steel reinforcing strips for taping inside or outside corner joints. Cut to length with scissors and apply with joint compound to straighten and add strength to any corner. Tape conforms to any angle.

WET n STICK®
Water Activated Joint Tape

09064
WET n STICK®
Water Activated Joint Tape
2"x75' Roll

This innovative joint tape is fast and easy to apply to walls and corners. Just saturate the tape with water, press it to your surface and reposition it as needed. After 20-40 minutes, the tape is permanently bonded to the wall and ready for coating with joint compound. Since no compound is needed for applying it to the wall, you save a whole day of waiting before finishing the job! WET n STICK® is creased for easy application in corners, and its permanent bond means it will not peel. ASTM C474, ASTM C475, and I.B.C. compliant. U.S. Patent #6071833.

Remove and Apply Caulk Like a Pro!

Remove Caulk

Caulk that's been in place for years comes off quickly and cleanly with the unique Caulk-Away™ tools from HYDE®. Two sharp blades reach into tight channels and corners to shave caulk clean from tile.

Apply Caulk

Use the Caulk-Rite™ to lay down a perfect bead of replacement caulk. No messy residue, no edge marks, no contaminating uncured caulk by using your fingers! Simply hold at a 45° angle and drag along the caulking bead. Excess caulk collects on the inside of the tool and can be reapplied over any gaps in the bead.

Do it the hard way, or the HYDE® way.
