

Red Devil

TOOLS

Founded as Smith & Hemenway Company, Inc. in 1872 in Hill, New Hampshire, our place in hardware history was established with production of several types of glasscutters, including the patented “Woodward Wizard”. This unique tool, with its tiny wheel for scoring glass was among the first in the industry and could be used as a glass breaker, can opener, corkscrew, knife/scissor sharpener and tack hammer. Because of the “Woodward Wizard” and other unique and dependable tools, our reputation for quality and reliability grew. During a buying trip to Sweden, the company’s founder, Landon P. Smith, heard a blacksmith remark “those little red devils” after sparks from a forge singed his arm. The name stuck in Smith’s mind and upon his return to the States he began to label many of the tools he sold with the RED DEVIL® trade name. By the late 19th century, do-it-yourselfers as well as professionals were depending on our top-performing products.

In the early 1900s, the RED DEVIL® name became synonymous with quality tools for professional and DIY projects. In 1932, George L. Lee, Sr. acquired the Vesco Tools Company’s line of wood scrapers - the first of nearly three dozen acquisitions designed to expand and improve the RED DEVIL® line. These acquisitions included complementary lines of painters’ tools, including wall scrapers, putty knives, glaziers’ diamond points and automatic point drivers. Throughout the years, RED DEVIL® continued to provide new alternatives for age-old problems, developing many innovative products like the ERGO 2000™ PRO putty knife and scraper line, one of the first on the market designed with ergonomic grip handles. In 1963, under the direction of George L. Lee, Jr., RED DEVIL® acquired the Schalk Chemical Company adding a line of adhesives, cleaners and sealants to its growing family of products. This chemical line would become a major contributor to our business and lead us to pioneer innovative, new products such as ONETIME® Lightweight Spackling, the first lightweight spackling on the market and LIFETIME® Adhesive Sealant, the first siliconized acrylic sealant guaranteed to last a lifetime.

Today, we build America’s most asked for tools and chemical products: RED DEVIL®, Inc. is still a privately owned, family business with state-of-the-art manufacturing facilities in Pryor, Oklahoma. We’re the only manufacturer to offer such a broad and diversified line of hand tools and chemical products for professional and home maintenance and improvement - more than 400 different products in all. In addition to producing caulks, sealants and tools under our own brand name, we also manufacture private label products for some of the nation’s largest hardware and home center chains. We are still building on our reputation for quality, dependability and innovation - guaranteeing that America’s latest generation of professional contractors and do-it-yourselfers will continue to depend on RED DEVIL® products well into the next millennium.

by **Red Devil**

Introducing the SANDFAST® Peel, Stick & Sand System by Red Devil® - the quick, hassle free way to use sandpaper on wood, metal, plaster/drywall, painted surfaces and plastic. It is quick to apply, easy to replace and the super strong bond means no movement when sanding. The key to the SANDFAST® system is the patented composite foam/film layer on the tool's base which holds the pressure sensitive sandpaper. By eliminating the need for clips, nuts or bolts, the SANDFAST® system has a totally flat sanding surface so it's easy to use, won't slip or rip and allows sanding into difficult corners. Best of all, the ergonomic handles ensure less fatigue and increased productivity.

Sanding & Finishing Tools

DETAIL SANDERS

With an easy-to-grip handle and small base, the Sandfast® Detail Sanders are designed to get into small corners and are perfect for fine details. Includes square and triangular shaped tools.
