Over 35 years ago the Old Stone Oven™ Company introduced the original baking stone for home use, designed by international pizza expert Pasquale Bruno. We believe it is still the best. Thicker than other stones available and made of a special blend of lead-free clays, it has a porosity and heat retention that is unmatched for giving a delicate, crispy, restaurant-quality crust to any pizza, focaccia or bread in a standard home oven. Oven and grill safe to 2000° degrees F.

Now we have added Heat Core. Specially-engineered Heat Core Centers have been incorporated into the 14"x 16" rectangular and 13", 14" and 16" round stones to concentrate heat at the center, delivering a perfectly crispy crust evenly throughout your pizza. This solves the occasional problem of a large pizza having an under-baked center while the outer edge is perfectly crispy and crunchy. These stones can also be used with care on outdoor grills - both charcoal and gas-fired.
